

## Duplex Gauges

### EX Series

#### Features

- ▶ 100mm (4") Dial Size
- ▶ Stainless Steel Case & Ring (Matt Finish)
- ▶ Brass or SS Internals @ Liquid Filled or Dry
- ▶ Bottom Connection
- ▶ Direct or Panel or Surface Mount
- ▶ Different Thread Options - 1/4" / 3/8" / 1/2" BSP / NPT
- ▶ Pressure Ranges from 0-1 upto 700 kg/cm<sup>2</sup>/bar
  
- ▶ **Special Freon and Ammonia Temp. Scales for R12/22/134a/502/ R717 gas application**

#### Design

The Duplex Pressure Gauge features two pointers which makes it possible to measure pressure from two different inputs on a single gauge. The gauge has 2 input ports. These gauges are generally glycerin filled to minimize pointer fluctuations and vibration damages. The user can select different pressure ranges as per requirement upto 700 bar. Gauge connections are available in various thread sizes as per requirement.

#### Application

This series of duplex pressure gauges is well suited to measure 2 input pressures on a single gauge. Common applications include measurement of pressure across filters, dual stage compressors etc...

#### How to Order - Duplex Pressure Gauge

While ordering please mention the below:-

- 1) Dial Size
- 2) Pressure Range
- 3) Thread Connections
- 4) Mounting - Bottom with Direct or Panel or Surface
- 5) Dry or Liquid Filled
